

Steam Johnny

Steam Johnny is a propane gas-fired high pressure boiler for thawing road culverts and drains, water supply and sewer pipes, gutters and rainwater pipes, hardening of concrete, steaming of tanks, sterilization, heating of PVC pipes and many more uses.

Steam Johnny has been in continuous production since 1954 and is well known to municipal street, road and pipe network authorities, forestry industries, fire brigades, the Swedish Road administration, the Swedish State Railways, pipe manufacturing companies and all people engaged in rock blasting during the winter months.

- Simple to use - propane fired.
- Takes 8 minutes to produce 100 PSI of steam.
- Easy to handle - weights only 110 lbs.
- Easy to transport.
- High pressure allows use of up to 300 feet of hose.
- Dimensions: 35" x 14.5" x 20" (Length x Width x Height).
- Has its own hand pump to replenish water in the pressure vessel.
- Hose available in different lengths.
- Long life expectance with low maintenance.

Manufacturer

Manufactured in Sweden

North American importer for the Steam Johnny.

Mckay Water Works Supply Ltd.
9753 – 54 Avenue,
Edmonton, Alberta
T6E 5J4
